

Multiple grip all-steel breakstem rivet. Unique crimp design provides wide grip range and smooth bubble formation on tailside. Available in low profile, large flange, and countersunk head styles.

Benefits:

- **Wide Grip Range**
One rivet can be used in multiple material thicknesses, a very unique feature for an all-steel breakstem rivet.
- **Mechanically Locked Stem**
Stem is locked in shell, eliminating the risk of mandrel head vibrating loose while providing a weather resistant joint.
- **Complete Hole Fill**
The bulbing formation of the Stavex® will fill slightly oversized or irregular holes, providing increased strength and vibration resistance.

Lo-Profile Head

Large Flange Head

IDENTIFICATION CODE:

Prefix is rivet style and material

For example, OBS01 is steel Stavex with a low profile head

The second and third digits of suffix denote diameter in 32nds of an inch

Last two digits of suffix denote approximate rivet length to end of body in 32nds of an inch

OBS01-006-18
